

Smartphone sales slip as top vendors consolidate market share

Global smartphone sales saw a modest decline in the second quarter of 2017, as market leaders Samsung and Apple consolidated their positions, a survey showed earlier this week.

Oliur Rahman

The IDC survey showed South Korean giant [Samsung](#) maintaining the top spot by delivering some 79.8 million handsets for a 23.3% market share.

[Apple](#) held onto the number two spot with a 12% share after delivering 41 million iPhones.

Samsung and Apple both slightly increased their market share compared with a year earlier, increasing sales 1.4% and 1.5%, respectively, IDC said.

Samsung facing growing threats despite record profits

31 Jul 2017

Huawei was the third largest vendor, with an 11.3% market share. The Chinese electronics giant closed the gap with Apple with 19.6% unit sales growth, adding two percentage points to market share from a year earlier, according to the survey.

Chinese manufacturers Oppo and Xiaomi rounded out the top five with a market share of 8.1 and 6.2%, respectively.

IDC said that overall sales were lower than a year earlier, the top five smartphone vendors showed positive growth while declines were seen for other manufacturers.

"It's no secret that the smartphone market is a very challenging segment for companies to maintain or grow share, especially as already low average selling prices declined by another 4.3% in 2016," said IDC analyst Ryan Reith.

Apple axes iPod nano and shuffle

"The smaller, more localised vendors will continue to struggle, especially as the leading volume drivers build out their portfolio into new markets and price segments."

The survey comes ahead of the anticipated release of new handsets from Apple and Samsung as well as other makers for the holiday season.

Apple managed to boost iPhone sales from the same period a year ago despite intense speculation about the 10th anniversary edition of the popular device.

But Apple has lost ground in the Chinese market, with revenues down 10% from a year earlier in its "Greater China" segment.
