Bluegrass Digital ranks amongst the best

Issued by Bluegrass Digital

5 Jun 2019

Clutch, the leading B2B ratings and reviews firm, has ranked Bluegrass Digital amongst the best .NET developers in 2019. Clutch ranks firms based on a unique methodology that evaluates a firm based on technical capabilities, market presence and verified client reviews.

As a leading web design and development company, Bluegrass provides digital transformation and world-class delivery, helping clients drive business growth through insights through data, user experience, innovation and technology built to scale.

Bluegrass CEO Nick Durrant says Clutch is committed to connecting companies of all sizes to service providers that will help them overcome their next business hurdle. "We are proud of our accomplishments thus far and our success is attributed to our amazing clients. Without them, none of our success would be attainable. It is an honour to be included in the Clutch research for the top .NET developers in 2019."

"We look forward to continuing this positive momentum going forward. Since 1996, we have provided top-of-the-line customised IT solutions to our clients across the globe. We have excelled in a variety of different industry fields particularly in web development, mobile app development, UX design and more. Our unique ability to provide excellent service to our customers stems from our team of over 20 experienced IT professionals," he explains.

Nick Durrant

Bluegrass has two client reviews on Clutch and both reaffirm its position as a leading provider in this field. The head of a Digital Production, Ad & Public Relations Firm stated: "Bluegrass Digital is consistently an excellent partner for any large web development project."

In another review, the head of Development, Investment Fund Management Company says Bluegrass has the knowledge and experience to fix any issue.

Durrant says their good reputation has extended beyond Clutch to their sister-websites: The Manifest and Visual Objects. "The Manifest provides business news, how-to guides, and industry reports and other metrics to help businesses narrow their search for their next business partner. We are featured in their category of the best managed service providers in 2019."

"Visual Objects is a portfolio website that showcases different portfolios of work from creative agencies to help businesses visualise a project before making a hire. Our portfolio is displayed among the top mobile app developers worldwide," he adds.

"In our pursuit to deliver excellence as a company and ensure a positive experience by our clients we have introduced new goals this year to measure client satisfaction. Data from our client survey is used to calculate our Net Promoter Score (NPS). Clutch also helps us in verification of our testimonials by ensuring an independent assessment," he concludes.
