

Natura Sugars introduces recyclable sugar sachets

Unrefined sugar producer Natura Sugars has released recyclable sugar sachets. The Blonde Sugar and Demerara Sugar are available in packaging made from BOPP (Biaxially Oriented PolyPropylene), a plastic that can be recycled.

Natura Sugars' sugar sachets

All Natura Sugars' products are vegan and GMO-free. They are crystallised from the first press of the sugarcane juice without removing all the molasses from the syrup, using traditional crystallisation techniques.

These sachets are currently only available to the hospitality industry but will be available to consumers nationwide soon.
