

Audi offers peace-of-mind

Audi customers offered peace-of-mind during uncertain times.

All new Audi vehicles are sold with the Audi Freeway Plan (AFP). This is a comprehensive service and maintenance programme designed to give the customer the best value in terms of peace of mind motoring for the duration of the contract.

The AFP eases the bother of budgeting for unexpected service and maintenance expenses and protects all Audi vehicles within its first five years and/or 100,000 kilometres (whichever occurs first). With an AFP extension, Audi vehicles are then covered for an extended period of 10 years and/or 300,000 kilometres.

Audi realises the uncertain circumstances currently facing Audi drivers and has implemented the following measures as an effort of relief during this time.

“ Stay at home, keep your distance, stay healthy, support each other – we are in this together. As a global company and a global community, our highest priority is to identify any opportunities to [#FlattenTheCurve](#). Stay safe.

— Audi (@Audi) [March 20, 2020](#) ”

The Audi Freeway Plan and Freeway Plan extension will continue its offering of peace-of-mind motoring by extending any contracts expiring between the period: 25 March to 30 September 2020 (both days inclusive), by including a complimentary and additional month to the plan.

In addition to this, any services needed to be performed as part of the time and/or mileage intervals included in the Audi Freeway Plan and Freeway Plan extension parameters, will be granted a grace period of 1 month and/or 1,500 kilometres. Audi hopes that this will bring some sort of relief, convenience and ease to our customers and Audi drivers during this time.
