

Aptronics wins Veeam Enterprise Project Award

Enterprise IT services provider Aptronics recently attended the 2016 Veeam Partner Summit, held at The Marion on Nicol in Johannesburg. At the event, Aptronics walked away with the Most Significant Enterprise Project award. Previously at the 2014 inaugural awards, they won the Enterprise Partner of the Year award. This Project Award recognises and rewards the partner with the best performance in the enterprise space.

Aptronics has a strong partnership with Veeam that has stood the test of time. Partners have to fulfil a number of criteria to win awards at the ceremony. These criteria include a combination of revenue growth, sales, technical certification and the quality of the implementation of products within the marketplace.
