

Green Economy Innovations for Service Delivery Conference: All presentations now available online

Issued by [GreenCape](#)

20 May 2021

In partnership with the City of Cape Town's Department of Enterprise and Investment, GreenCape hosted a two-day Green Economy Innovation for Service Delivery Conference on the interactive Enlit Africa digital event platform on 21 and 22 April 2021.

This digital conference ran over two days, and hosted 63 speakers for 14 sessions over three channels, showcasing local and international best-case examples of alternative service delivery for informal settlements, across energy, water and sanitation and waste management.

“We can learn so much from reviewing local and international examples of alternative service delivery solutions for informal settlements across energy, water and sanitation and waste management,” said Alderman James Vos, City of Cape Town mayoral committee member for economic opportunities and asset management, during his opening address. “We are working transversely across various City departments to drive innovation in service delivery, and unlocking the economic potential of this innovation remains a high priority for us,” he added.

SA green companies among 1,000 global profitable cleantech solutions

GreenCape 14 Apr 2021

Day one of the conference focused on sector-specific sessions hosted simultaneously across energy, water and sanitation and waste management. Day two of the conference had cross-cutting panel discussions, covering procurement, public and

private collaborations and the need for effective community engagement and mobilisation.

All of the presentations for the conference are now available to view. Click on the links below to access the recordings.
