

Consistently accurate coding for agrochemical products

Issued by [Pyrotec](#)

26 Jul 2022

Agrochemicals play an important role in global food production as they're used to increase agricultural yields and protect crops from pests. However, because of their generally hazardous nature, operational logistics for their transportation and storage are particularly complex. Because of this, high-quality packaging coding is essential.

The continuous inkjet (CIJ) 9029 printer from Markem-Imaje, locally available from Pyrotec PackMark, is ideal for harsh conditions. It operates reliably, it's easy to install, and its total cost of ownership is low. CIJ printers are ideal for printing onto HDPE, PET, and other bottle substrates because they offer superior print quality on rounded smooth surfaces. Additionally, accurate and consistent marking of batch codes and numbers, lot codes, and manufacture dates ensure brand owners remain within regulation guidelines.

For manufacturers who want a trustworthy printer that helps secure products with quality, cost-effective codes; assurance that equipment is easy to order, install, use, and maintain; and coding that can quickly be brought online, even after storage and in challenging environments, the 9029 is ideal.

Key benefits include:

- Easy installation.
- Quality, cost-effective coding.
- The 9029 can be moved anywhere it's needed thanks to its robust IP55 fully stainless-steel design.
- Messages are easy to create and implement.
- Creating and uploading codes is quick, thanks to its user interface and USB connection.
- It's easy to run and smart to operate. The M6' all-in-one ink circuit runs for approximately 8,000 hours*, and the time it takes to change consumables is fully optimised. Changeover takes less than six minutes and no additional maintenance is needed.
- This coder's intuitive online guide makes managing daily coding highly efficient.

Print features include up to four lines of print at a speed of 4.4m/s, and font heights from 5 to 24 dots. Character heights range from 1.8 to 8.7mm with a wide array of character options. The message library stores up to 100 messages, and the WYSIWYG backlit blue screen offers an international operator interface with a choice of 31 languages.

Pyrotec

Pyrotec is a proudly South African company with its focus aimed firmly on the future. Its five brands - Pyrotec PackMark, Pyrotec PackMedia, Pyrotec PackLink, Pyrotec PackWorx and Pyrotec Finance - make this an industry-leading company that specialises in a comprehensive range of coding and labelling equipment, on-pack informational and promotional devices, merchandising solutions, development and manufacturing of automated systems for the packaging and manufacturing industry and making finance options available to customers. Pyrotec's software offering ensures product integrity, optimises coding activities, and helps secure centralised data management systems and label tracking systems.
