

Impact Management and Measurement Masterclass

The Impact Management and Measurement Masterclass is a highly sought after learning event attended by professionals and practitioners from the public, private or non-profit/social sectors who are involved in designing, implementing, managing, or funding programmes aimed at creating positive economic, environmental and social impact.

Including programme and project developers, implementers and managers, monitoring and evaluation practitioners, corporate social investment managers, foundation and philanthropy staff, social entrepreneurs, social and impact investors, social purpose organisations, senior and executive managers, board members of foundations and trusts.

The three-day in-person event is focused on:

- How to manage investment funds, resources, portfolios and programmes more effectively and ultimately make a bigger and more positive impact on the economy, environment and society
- Developing and implementing world class impact management, measurement and reporting practices
- Understanding the prevailing guidelines, principles and standards that are evolving and that underpin the social and impact investment life cycle from strategy, through due diligence to management, measurement, verification, reporting and exit.

Take advantage of this unique learning opportunity, the only one on the Africa continent that is focused entirely on understanding how to design, manage, measure, analyse, verify and report on investment impact.

Dates: 7 – 9 May in Johannesburg and 4 – 6 June in Cape Town

Time: 09:00 – 16:00 daily
